

AELIAN

BIOTECHNOLOGY

At Aelian Biotechnology, we combine two of the most powerful technologies in modern biology, CRISPR screening and single-cell sequencing, to identify critical genes and pathways driving disease states or provide unique insights into the mechanism of action of drugs. Our company culture is fast-paced and collaborative with a strong commitment to excellent science. We are looking for people who are passionate about our mission and who genuinely care about delivering superior scientific work.

Currently, we are looking for **Research Technicians (m/f/d)** with experience in:

- Culturing, freezing and thawing of murine and human cell lines
- Molecular biology, particularly PCR, Gibson Assembly and cloning
- Genome engineering and/ or CRISPR screening using CRISPR/Cas9 technology
- Culture and manipulation of human induced pluripotent stem cells or other stem cells

Good knowledge on MS Word and Excel is a prerequisite for your daily work. As Aelian Biotechnology operates in an international environment, good English skills are required.

To be formally eligible, you should have completed a Höhere Technische Lehranstalt (HTL), a Bachelor's Degree or a Master's Degree. We are looking for team players that are driven and enjoy cracking tough nuts.

If you would like to be part of a young and exciting company, please send your application to Dr. Tilmann Buerckstuemmer (jobs@aelian.bio) no later than February 28. Note that candidates will be invited for interviews on a rolling basis!

Disclaimer according to Austrian Law: Minimum base salary according to collective agreement for this full-time position is EUR 2.250 per month. Remuneration will be according to experience and performance.
